

Reduce Our Dependence On Foreign Oil With AMSOIL

Independent tests show improved fuel economy up to 8.2% in trucks using AMSOIL synthetic lubricants. If all trucks in America used AMSOIL synthetic engine oil, gear lubes and drive train fluids, it would save enough fuel to drive to the sun and back 86 times.

But there is another way to reduce oil usage. AMSOIL synthetic engine oils and lubricants are designed for extended drain intervals. Mack Truck owner Haywood Gray of Colonial Heights, Virginia, drove over 400,000 miles between oil changes using AMSOIL synthetic lubricants, an AMSOIL By-Pass Oil Filter, and oil analysis.

Fewer oil changes means less oil used. AMSOIL has been the leader in synthetic lubrication since 1972. Keep America on the road with AMSOIL.
