409,000-Mile Oil Drain

A 1990 Mack Truck owned by independent operator Haywood Gray of Colonial Heights, Virginia, was driven more than 400,000 miles between oil changes using AMSOIL synthetic lubricants.

8.2% mpg Increase

Replacing conventional lubricants with AMSOIL synthetic lubricants in class 8 diesel vehicles yielded fuel economy benefits up to 8.2%. This month-long test, conducted by a leading research institute using the SAE J1321

Joint TMC/SAE Fuel Consumption Test Procedure Type II, an industry standard procedure for comparing in-service fuel consumption of vehicles operated under two conditions, proved the superior fuel economy benefits of AMSOIL over conventional petroleum-based lubricants.

The logo for AMSOIL, featuring the brand name in a bold, italicized, sans-serif font with a registered trademark symbol. The letters are white with a black outline and a slight shadow effect, giving it a three-dimensional appearance.
